

"This wise and thoughtful book, *de-mystifying ... Medical Intuition*, does exactly what the title promises. It shows how each of us, in our own way, already has strong intuitive abilities, and it brings us into the world of the medical intuitive in a manner that meets the paradoxical goals of staying simple and going deep. The information it offers is simple and accessible; the issues it addresses are deep and challenging. No 'one size fits all' simple-mindedness here. The book is an excellent introduction for anyone wishing to learn more about medical intuition."

Donna Eden

Author, *Energy Medicine*

"Prior to 1988, the words psychic and clairvoyant were commonly used for individuals who had abilities to 'know' facts that were not available to them from direct observation. Until then, Edgar Cayce had been the best known Sleeping Prophet. Earlier, John Elliottson had pioneered the concept of medical diagnosis with the use of mesmeric trance in the 1830s. Today, there are 300,000 listings for Medical Intuitive. Lori is one of the few who has applied a scientific approach. I had the pleasure of observing two of her basic courses and I applaud her efforts to further this field."

C. Norman Shealy, M.D., Ph.D.

President, Holos University Graduate Seminary

Author of 21 books, including *The Creation of Health* with Caroline Myss and *Life Beyond 100—Secrets of the Fountain of Youth*

"Like it or not, we are in a world where energy medicine, mystics, and intuitives are becoming more and more commonplace. Lori's attempt to de-mystify this process can only serve to help educate both consumers and clinicians. Her attention to the ethical consideration of intuitive knowing is a model for the field of Energy Medicine. This book should be mandatory reading for the 21st century!"

Mary T. Sise, LCSW

President, Association for Comprehensive Energy Psychology

"Any questions you might have about medical intuition can be answered by this book. It is well presented, well researched, and explains the field in a way that anyone can understand and receive value from reading it—not an easy task. Lori succeeds on every level."

Carol Ritberger, Ph.D.

Medical intuitive and author of *Your Personality, Your Health* and *What Color Is Your Personality?*

"For professionals and consumers alike, *de-mystifying ... Medical Intuition*, offers a comprehensive and unique view of this burgeoning field. Written succinctly and with great clarity and style, it examines areas as seemingly diverse as medicine, intuition, energy, ethics, and consumer awareness. It synthesizes these topics seamlessly into a living tapestry of thought that carries the reader to the frontiers of consciousness and beyond. It is powerful and groundbreaking. The depth and breadth of Lori's understanding is unparalleled—and I have been studying the best in their fields for over 20 years. It is the gold standard by which all other books in the field will be measured in years to come. A stunning achievement, destined to become a classic. I want to do cartwheels for the world!"

Patricia Mallory Game

President, Zen Girl Television, Inc.

Imagine a world where you could look inside your own body or the body of another to see what is truly going on!

- This is your opportunity to explore the inside world of wisdom of your own foremost health expert—your body. Your appreciation for the body, as your willing partner, will never be the same!
