

Regression Works™

Learn To Facilitate Age & Past Life Regression!

Past life regression work involves using a deep relaxation method to create a state of mind which allows you to image and access memories from past life experiences. It is a distinct technique differing from hypnotherapy. Age regression uses a similar relaxation

technique and focuses on retrieving memories from earlier in current childhood.

Regression work can be a very useful tool to assist clients in moving forward with their present lives. Whether one believes the recollections are from actual childhood or past life memories or simply a creative imagination exercise, the results and insight gained are very powerful.

Regression is one tool that can access the root of the matter in a very time efficient, client-centered fashion. The Practitioner is not intuitively uncovering the past life image for the client. Rather, the clients themselves are recalling the images, memories and drawing their own concurrent realizations. It is a tool that uncovers and empowers. It is one that is being more actively sought by clients to help them move forward by "going back".

This 5-day Training is open to professionals with a minimum of 2 years experience in a helping field. Class time is spent equally covering conceptual material and practicing the techniques taught in class. Participants will be prepared to conduct regressions upon completion of this Training and may chose to conduct full 2-hour regression sessions or combine the skills learned with their existing tools.

Increasingly, helping professionals are being called upon to use support resources from other disciplines and to mobilize increased insight from within their clients. Training in Regression Works™ gives professionals from all disciplines an added tool to facilitate deep exploration within a relatively short period of time. As our frames of reference continue to expand, it is important that we are able to understand at many levels what may be influencing our clients' present lives.

Foundation Level Training Includes:

- Conceptual theories and uses for Age & Past Life Regression.
- Ways to induce the relaxation process and keep the client focused, the art of respectful attending and keeping yourself out of the way.
- Exploration of the connections between physical symptoms and their roots in early childhood or past lives.
- How to search for relationship connections as well as historical, cultural and geographical information, and overcoming repeated patterns and obstacles that still affect our present lives.
- How to maximize or uncover gifts, talents and strengths and explore the purpose of this present life and agreements made with key players.
- Experiencing and understanding the birth, death and the interlife process.
- Suggestions for clients of how to process and frame the information retrieved after the session as well as recommendations for further follow up.
- Linking retrieved information with research to validate findings.
- Positive frameworks for practitioners including presenting this work to others, business recommendations, preparing your work area and recording methods.
- Recommended resources and reading list.

This comprehensive 40 - hour Certificate Training is open to a maximum of 20 participants.

Pre-requisite: A minimum of two years experience in a helping field.

"This training encourages respectful attending as we witness others reacquaint themselves with what they already know, but may have temporarily forgotten."
